What GPS is

Global Padel Series (GPS) is an **open, aggregated calendar** for padel. Padel is played across many separate circuits, each with its own calendar and ranking. GPS brings them into **one open series** — a shared calendar and a single open ranking — **without taking anything away from the organisers**.

GPS combines three things that stay distinct:

- **GPS** — the open calendar/series that aggregates events.
- **OWPR** — the open world ranking: one published rule reads every event.
- **GPA** — the association that owns the format, holds the rules and governs them.

What you keep

Whatever your level — a circuit, a country, a club or a single event — when you join GPS you **keep your own identity, brand, entries, sponsors and community**. GPS does not take entries, does not charge for them, and does not keep a parallel list of players.

What you gain

- A place on the **shared GPS calendar**.
- A **published points value** for your events, declared before they are played.
- Your results in **one open, global ranking (OWPR)**, comparable across circuits.
- The backing of a connected, growing series.

How it is organised (the pyramid)

GPA (owns + governs) → GPS + OWPR → Regional contractor → Country franchise → Local organisers/clubs/events → Players

Events aggregate **upward**: a local event counts in its country, the country in its region, the region in the global series — all under the same open rule.

Ways to join

- **Country / regional franchise** — a trusted partner that holds and grows a country (or coordinates a region) within GPS.
- **Event / organiser adhesion** — a single event or club that joins the calendar and the ranking.
- **Community partner** — a community that promotes padel and brings players and events into GPS.
